WAF Blocks in Console:

The screenshot shows two panels from the Splunk interface. The left panel, titled 'Action totals', displays a table of request counts for various terminating actions. The right panel, titled 'Top 10 rules', displays a table of request counts for the top 10 rules that matched the most requests. Both panels include a 'Filter displayed data' input field at the top.

WAF Blocks in Console:

Key Security Metrics

Metric
Total WAF events
Blocked requests
Block percentage
Unique source IPs
High-severity findings
Critical findings
Open incidents
Awaiting human review

Material Changes

- AI enrichment failed. Refer to deterministic metrics.

Business Impact

Unable to assess due to AI service unavailability.

Leadership Attention Required
